

DOT 4 Brake Fluid

PN X60432 (32oz)

XLR8™
ACCELERATE PERFORMANCE

Product Description:

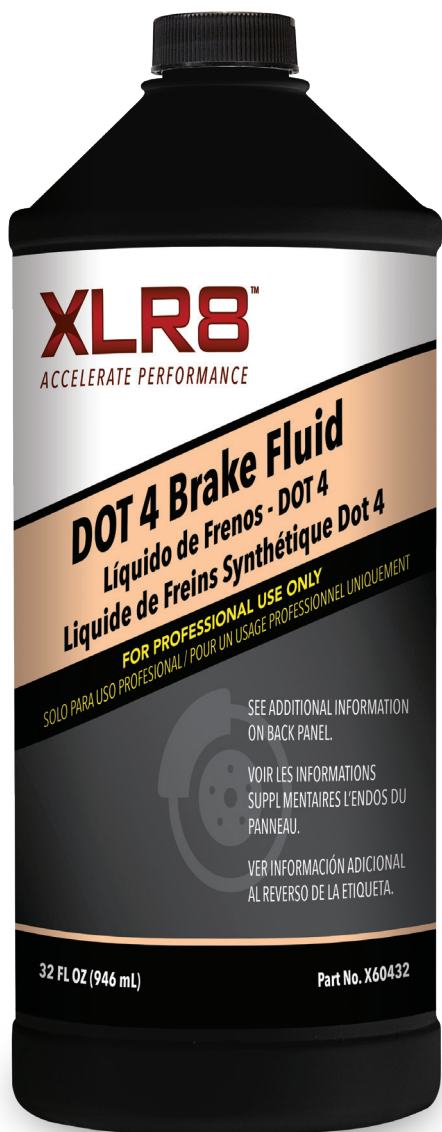

XLR8 DOT 4 Brake Fluid is formulated as a high-quality glycol ether fluid. It is engineered for all disc and drum type brake systems which call for DOT 4 and DOT 3 performance. This premium quality product exceeds the requirements of Chrysler and General Motors.

Advantages & Uses:

XLR8 DOT 4 Brake Fluid is especially suitable for modern vehicles and the thermal demands put on brake fluids – increasing operating temperatures due to front wheel drive and aerodynamic body designs which reduce airflow.

Features:

- Minimum dry boiling point exceeds 446° F requirement
- Minimum wet boiling point 311° F
- Meets FMVSS 116, SAE J-1703 and Federal Specification W-B-680C
- Compatible with rubber components
- Helps prevent seal hardening or softening
