

Combustion Chamber Cleaner

PN X202 (12oz)

XLR8™
ACCELERATE PERFORMANCE

Product Description:

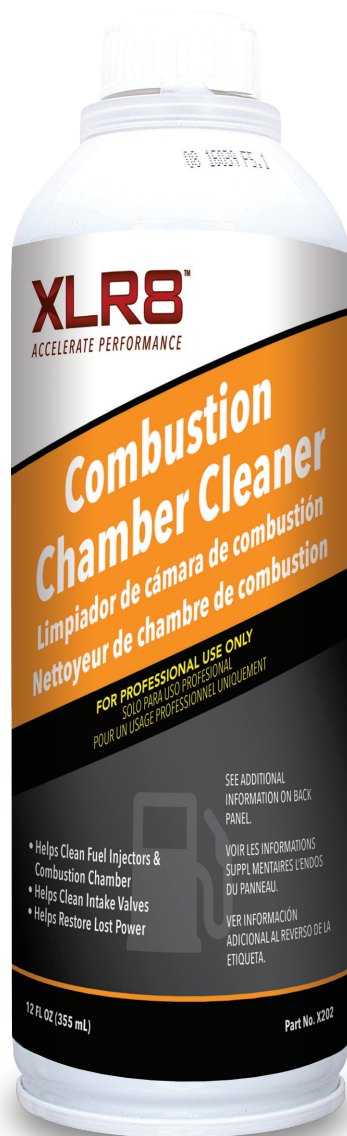

Deposits can accumulate in gasoline-powered engines due to low quality or unadditized fuels and from certain types of driving patterns. This can lead to poor drivability, loss of power, lowered fuel economy, engine “rap” or other noises, dirty fuel system, decreased acceleration and exhaust valve sticking. XLR8 Combustion Chamber Cleaner can prevent and eliminate these problems. XLR8 Combustion Chamber Cleaner is specifically formulated to clean fuel system and remove combustion chamber deposits. It also helps to restore lost engine power.

Advantages & Uses:

- Helps restore “like new” performance to high mileage engines
- Can help restore fuel economy
- Minimizes exhaust emissions

Features:

- Contains highly effective detergents to thoroughly clean intake manifold, runners, and combustion chamber
- Improves power
- Improves drivability by helping reduce surging, stumbling, hesitation, stalling and rough idling
- Helps improve acceleration
- Helps restore engine performance
- Rust and corrosion protection of vehicle fuel system and gasoline distribution system
- Safe for catalytic converter and oxygen sensor
- Use once a year or every 15,000 miles
