

Diesel Fuel Treatment

PN X301 (8oz)

XLR8™
ACCELERATE PERFORMANCE

Product Description:

XLR8 Diesel Fuel Treatment is a premium diesel fuel additive formulation with a proprietary blend of detergents, corrosion inhibitors, lubricity improvers, stabilizers, and cetane improver.

Advantages & Uses:

- Especially suitable for modern diesel vehicles, both automotive and heavy duty
- Works well in older vehicles
- Boosts fuel cetane to reduce engine knock and ignition delay, thus improving power and improved ignition and fuel burn
- It is advisable that XLR8 Diesel Fuel Treatment be added while the fuel is a minimum of 10 degrees above the fuel's cloud point. Recommended at a treat rate of 8 oz for every 20 gallons of fuel

Features:

- Helps clean injectors and restore flow and spray pattern
- Helps improve cetane number by up to 2 cetane numbers to improve ignition and reduce knock and smoke
- Helps prevent rust and corrosion on injectors
