

CVT Transmission Treatment

PN X503 (8oz)

XLR8™
ACCELERATE PERFORMANCE

Product Description:

XLR8 CVT Transmission Treatment is manufactured to improve anti-wear properties. It is designed to keep seals soft and pliable while promoting smooth shifting. By design, CVT's high speed operation and extreme pressure can cause severe degradation to the CVT fluid. XLR8 CVT Transmission Treatment is formulated to prolong the CVT fluid, maintain frictional properties, as well as help prevent or slow down the formulation of deposits.

Advantages & Uses:

- Safe to use in all belt and chain type CVT
- Compatible with all CVT fluids
- Compatible with all DSG and DCT fluids
- Helps prolong the life of CVT fluid
- Helps prevent deposit formulation
- Helps increase performance
- Promotes smooth shifting

Features:

- Improves anti-wear properties
- Contains seal swell additive
- Promotes smooth shifting
- Protects transmission life
